

# Document Pro iDoc Market Portal

## ACHIEVE GREATER TRANSPARENCY AND TRUST

The iDoc Market portal allows the county and designated users to access county recording information from anywhere with internet access. The county's images and index information are uploaded to the web portal each night and made available to its subscribers. Users can then easily locate documents, view detailed indexing information, and view and print images. Through security and password protection, the county maintains control over who has access to the online documents.

## IMPROVE OPERATIONS

The web portal offers a variety of key features designed to enhance day-to-day operations.

- Nightly sync process includes options to only upload validated, new, or updated documents.
- Administration interface provides full control over user access, security roles, and site usage, including the ability to establish subscriptions and pricing.
- Advanced user tracking allows access to the number of new subscribers, printed documents (new vs. reprinted), financial information, and Document Alerts sent.

## INCREASE ACCESS

Expand the range of services you offer and further ensure the successful and efficient management of your jurisdiction's records. These features deliver valuable benefits to both your office and constituents:

- Documents can be accessed from any computer with internet access.
- Robust search capabilities include searches by date, document number, party information, document type, or legal entry.
- Electronic certification capabilities can be added to simplify and expedite the process for constituents to obtain certified copies of documents.

## Welcome!

Welcome to the Document Marketplace! This site will empower you to log in to the participating counties in order to access and print images for recorded documents. First, register with us (it's free!). Then, choose which county or counties you would like to subscribe to. We offer both short-term Day Passes and longer term subscriptions, depending on your needs. You can then perform unlimited searches for the duration of your subscription. We'll keep track of your prints and charge your credit card accordingly. We hope you enjoy your experience!

[Get started »](#)

### Search

Quickly find the document you're looking for with powerful search tools. See basic document details in the results to help narrow down the list.

### eCertified Copies

#### Coming Soon!

Request eCertified copies which are delivered in minutes electronically from participating counties. Look for the icon above for counties that are offering this service.

### View

Once you've found the document you want, click View to see the recorded document information.

### Document Alerts

Protect yourself from fraudulent activity and be notified. Look for the shield icon for counties that are offering this service. Click on the shield to get started!

### Print

Print the entire document, or choose which pages you'd like.

## ENHANCE SECURITY

The portal provides the convenience of access from any location. Plus, if you elect to have Tyler host the web portal, you'll have a complete offsite backup of your images and data, providing the perfect balance between accessibility and security of your intellectual property. These enhanced security settings help keep your records safe:

- Security Manager provides extensive control over assignment of permissions and access to features in the portal.
- Added security allows for downloading images to a PDF format.
- Custom watermarks can be used to designate document origin for images that are viewed, printed, or downloaded.
- Optional anonymous login that allows data to be searched and viewed but restricts displaying of the images.
- Document Alert can be added to actively protect constituents from land records fraud through an online notification system.
