

# Assets Mobile

Tyler's Assets Mobile is an intuitive, easy-to-use mobile asset management solution that integrates seamlessly with your Enterprise ERP, powered by Munis®, solution. Tyler's Assets Mobile allows you to quickly perform asset inquiries, reconciliation, and record updates. Leverage barcoded tags or Radio Frequency Identification (RFID) for greater efficiency in asset reconciliation and inventorying.

## MANAGE ASSETS AT YOUR FINGERTIPS

Maintain assets right from your handheld Nautiz X6 or Nautiz X41 device using up to date data direct from Enterprise ERP. Simply download the assets you want to your device, and you can perform on-the-spot inquiries, as well as inventory reconciliation. Upload updates to Enterprise ERP removing any redundant or offline processes.

## FEATURES

- Asset Inquiry
- Asset Inventory
- Asset Updates
- Discrepancy view
- Counted view
- Uncounted view
- Print barcoded labels
- RFID scanning
- Accessible via WLAN or WWAN

## BENEFITS

- Experience freedom and flexibility by going wireless
- Access and update Enterprise ERP data online in real-time
- Enjoy increased accuracy with barcode or RFID scanning
