

ENTERPRISE PERMITTING & LICENSING Code Enforcement

SEAMLESS INTEGRATIONS
Enter code enforcement information directly to Enterprise Permitting & Licensing

WORK ON THE GO
Use Workforce Mobile to update cases in real-time

INCREASE PRODUCTIVITY
Create automated workflows and to-do lists with the click of a button

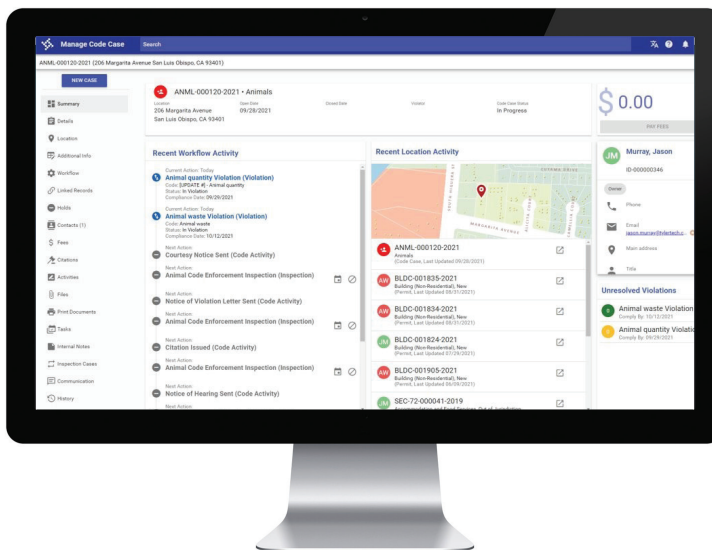

Keep your community safe with the Code Enforcement module for Tyler's Enterprise Permitting & Licensing application. Your organization can monitor code cases and enforce ordinances to maintain community safety. Agency staff can view and update code case history and track violations, inspections, and more, all within Enterprise Permitting & Licensing. In Code Enforcement Mobile, inspectors can take electronic records into the field while creating and updating code cases directly from an area map.

SEAMLESS INTEGRATION WITH ENTERPRISE PERMITTING & LICENSING

Seamless integration with Enterprise Permitting & Licensing allows staff members and constituents to easily access the information and functionality they need. With Civic Access integration, constituents can view the status of their code case and pay any applicable fees online. GIS-powered workflows allow agency staff to identify trends through comprehensive reporting; granting access to an entire code case file and tracking its progress, and reporting findings in real-time.

VIEW A CASE'S FULL HISTORY WITH THE CLICK OF A BUTTON

Agency staff can monitor a central record of code case activity to enforce local code ordinances, making their communities safer. Code enforcement professionals can also use this tool to review case details, including active permits, owner information, and violations, allowing them to fully prepare prior to visiting the site and track the case's progress afterward.

Enterprise Permitting & Licensing manage code case summary screen displays recent activity by workflow action and location, including unresolved violations.

END-TO-END ENFORCEMENT TECHNOLOGY

In addition to Enterprise Permitting & Licensing and Code Enforcement Mobile, Tyler offers software solutions that can help your organization capture and route code violations before they arrive to enforcement staff and collect payment post-investigation — creating a seamless enforcement strategy from end-to-end.
