ERP PRO

Code Enforcement

CUSTOMIZE PROCESSES

Tailor the workflow for each incident type to match your unique needs.

INCREASE EFFICIENCY

Enable inspectors to manage and resolve incidents without leaving the field.

ENGAGE THE COMMUNITY

Allow community members to report an incident 24/7/365 from a mobile device.

ERP Pro Code Enforcement simplifies and streamlines the code enforcement process. It allows organizations to customize incidents to their unique needs and automatically generate incident notices, and enables citizens to report incidents anytime, anywhere.

EMPOWER YOUR STAFF AND YOUR COMMUNITY

The features and functionality available in ERP Pro Code Enforcement allow you to put more power into the hands of your inspectors and your citizens by supporting automated processes to reduce office foot traffic and paperwork.

- Store incident attachments electronically, including documents and pictures
- Define the workflow for each incident type
- Enable citizens to report incidents online
- Generate incident reports with ease
- View important information at a glance with interactive charts and graphs

TYLER INTEGRATIONS

Code Enforcement integrates with a variety of ERP Pro modules, including:
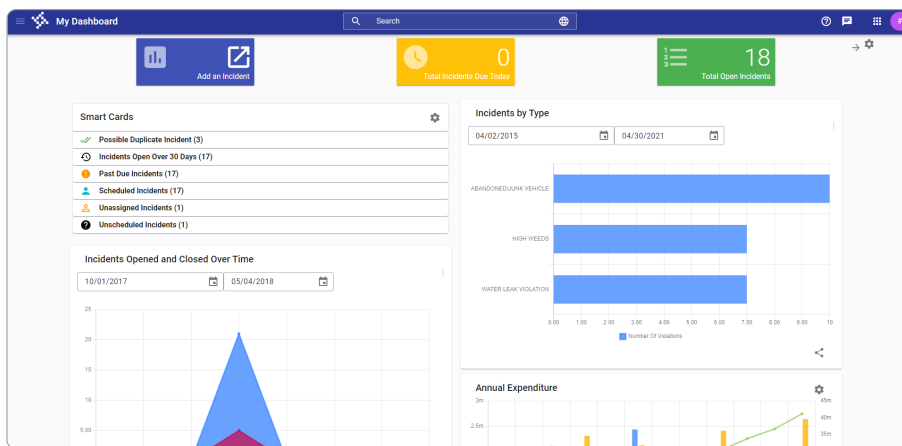

- Contract and Property Management
- Permitting
- Licensing

HIGHLIGHTS

- HTML5 technology allows the module to be accessed from any device
- Automated data sync delivers real-time information
- Mobile accessibility reduces travel and streamlines workflow between the office and the field
- Smart Card functionality alerts users to items requiring their attention such as past due incidents or duplicate incidents

ADD-ONS

ERP Pro Code Enforcement Mobile, Code Enforcement Online, and Esri® Parcel One Way API are available as optional add-ons to ERP Pro Code Enforcement.

BOOST FIELD PRODUCTIVITY WITH CODE ENFORCEMENT MOBILE

Empower inspectors to manage and resolve incidents and keep office staff informed without leaving the field. ERP Pro Code Enforcement Mobile works with the ERP Pro Code Enforcement module to enable inspectors to:

- Access incidents from any Android™ or iOS® device

- Snap and attach incident photos

- Dictate and store incident notes

- Map and route incidents with Google Maps™ integration

- Manage and resolve incidents without an internet connection

Code Enforcement Mobile
