

FIRE PREVENTION MOBILE

Pre-Plans Mobile Software

ACCESS LIFESAVING SAFETY INFORMATION ON SCENE

Critical building safety information, including layout, conditions, and hazardous materials

EXPERIENCE SEAMLESS INTEGRATIONS

Pre-Plans Mobile includes integration capabilities with CAD, Enterprise Public Safety, and Enterprise Permitting & Licensing

GO PAPERLESS

Access pre-plans from an office desktop or on a mobile device at the incident scene

INSTANT ACCESS TO LIFESAVING SAFETY INFORMATION

When responding to a critical incident or fire call, seconds matter. Pre-Plans Mobile for Fire Prevention Mobile allows first responders and incident commanders to instantly access mission-critical building safety details that keep both building occupants and fire professionals safe, including:

- layout
- conditions
- sprinkler/suppression system used
- emergency contacts
- hazardous materials present
- construction type
- roofing material
- nearest hydrants
- Knox Box location
- number of stories and suites or occupants

TIME-SAVING INTEGRATIONS

Pre-Plans Mobile seamlessly integrates with other Tyler products to ensure that no critical information gets missed. Integrate Enterprise Permitting & Licensing to access building inspection data, use Enterprise Public Safety to coordinate scene calls from dispatch software and automate mutual aid across departments, or access CAD to view pre-plans directly from the scene with automated data transfer to command vehicles.

PAPERLESS & ACCESSIBLE FROM ANYWHERE

Whether you're inputting fire inspection data directly from the field, viewing pre-plan data on the scene, or reviewing details from an office desktop, your department can access paperless pre-plan data from anywhere. With availability on desktop and mobile devices, your department can share drawings and photos of the building location to other devices to provide a clear depiction of existing risks, and access these files across departments.
