

## Tyler University

## Tyler University for School ERP Pro

# **A Virtual Learning Platform for Professional Development**

The Tyler U virtual learning platform helps reduce your new employee training costs while also giving more experienced staff the opportunity to revisit important topics. Tyler U makes it easy to schedule classes, track staff training, and more.

This program supports new and existing staff members as they acquire and refresh their School ERP Pro (Infinite Visions<sup>®</sup>) skills, ensuring a successful experience during the school year.

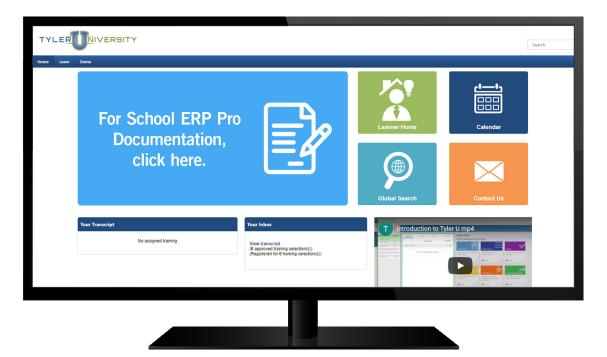

#### Curriculum

Your staff can access more than 200 resources for training and professional development from their computer, improving their knowledge of multiple School ERP Pro features, including:

- General Ledger
- Human Resources
- Purchasing & Payables

- Employee Access
- Payroll

And more

Learning Home Page

### **Online Professional Development**

Once your district is set up on Tyler U, your staff can easily access School ERP Pro classes by searching for relevant courses and materials within the online program. The available training provides step-by-step, task-specific directions. At the end of e-learning courses, an interactive quiz assesses whether the user absorbed the information in the module.

#### Reporting

Course Curriculum

Tyler U provides a reporting system that tracks course participation and the success rate of course participants. District administrators can determine which staff members have completed e-learning courses, which are working on them, and which have not started.

To get started with Tyler U at your district, contact us at info@tylertech.com
