

# Digital Titling

*Driving motor vehicle services forward*

## STREAMLINE AND EXPEDITE VEHICLE TITLING

While many states have supported the electronic transmission of title and registration data for more than a decade, Tyler's Digital Titling solution enhances existing, tried-and-true motor vehicle services used by vehicle owners, dealers, and businesses to work with a completely modernized management system. Flexible and modular, the SaaS platform was built with government in mind. It is configurable to fit within any state agency's existing digital infrastructure to work with all channels already utilized for registration renewals, including in-person, kiosks, and online.

## TRANSFORM MOTOR VEHICLE OPERATIONS

Tyler's industry-first, fully digital titling solution, made possible through our strategic partnership with Champ Titles, brings all channels where titling, registration, and lien management-related work is conducted, including dealers, lenders, insurers and drivers, into a shared ecosystem to streamline vehicle-related processes. This transformative approach to digital titling, registration, and lien management changes the way vehicle titles are created, managed and transferred, maximizing efficiency and reducing costs to state agencies.

## BENEFITS TO STATE AGENCIES

- Retires legacy paper processes, increasing time and cost savings
- Reduces the potential for data entry errors for improved recordkeeping
- Decreases foot traffic and enhances DMV operations for personnel and customers
- Cost-effective flexible funding model reduces risk to state DMVs

## EVERYONE WINS WITH DIGITAL TITLING

Tyler's Digital Titling places drivers at the center of the motor vehicle environment, providing numerous benefits over legacy paper processes, including touchless transactions, rapid issue resolution, and instant access to digital vehicle titles. When used in conjunction with user Driver Portals, the solution enables residents to conduct title and registration-related transactions remotely, simplifying title management and distribution operations for stakeholders at every level.

Built to streamline all vehicle management-related activity into one ecosystem, Digital Titling ensures that state agencies and vehicle owners, in addition to dealers, lenders, and insurance companies can take advantage of the seamless communication and operations this modernized solution enables. Paperless lien management enhances the quality and control of data and reduces fraud and security risks for dealers and lenders. This solution eliminates costs related to postage, handling, and potential loss of paper titles while also reducing title processing and turnaround times, improving efficiency, and enhancing customer experiences across the board.

## CLIENTS

These organizations have entrusted their Digital Titling programs to Tyler Technologies.
