

VETERANS' BENEFITS Interactive Reporting

Integrated reports and dashboards give insight into Veteran information and office operations. SHOW COMPLEX DATA

A full range of visualizations provides detailed information at a glance.

DRILL DOWN FOR

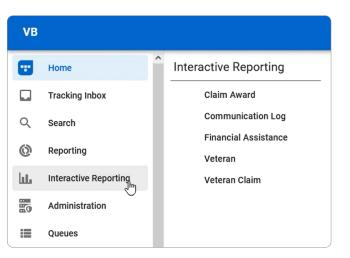

Get the information you need to improve effectiveness and efficiency processing claims.

When you are working to process Veterans' benefit claims, it is imperative to know how well your program is working. The optional Interactive Reporting module gives users of Tyler's Veterans' Benefits application transparent and trusted visualizations of key claims details and operational information.

DEFINED VIEWS OF THE REPORTS YOU NEED

Interactive Reporting is a modern, user-friendly tool that effectively visualizes the day-to-day information vital to your team. Interactive views display the data and reports you need. Common reports include:

- Veteran Information
- Veteran Claim
- Financial Assistance
- Claim Awards
- Communications Log

INTERACTIVE REPORTING

Interactive Reporting is an optional module available with Tyler's Veterans' Benefits application.

FULL RANGE OF VISUALIZATIONS

Interactive Reporting allows data to be visualized in a variety of table, graph, chart, and map views, which you can interact with using drill-down and filter functionality.

TAILORED VIEWS FOR YOUR WORK

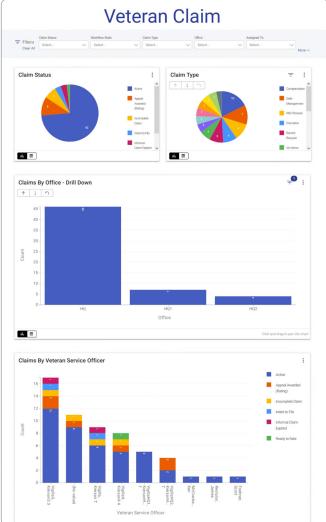

Identity based reports show you only the information that is pertinent to you and your work. This not only ensures the privacy and security of the data but also helps you to be more efficient, as you are able to focus on the data you need.

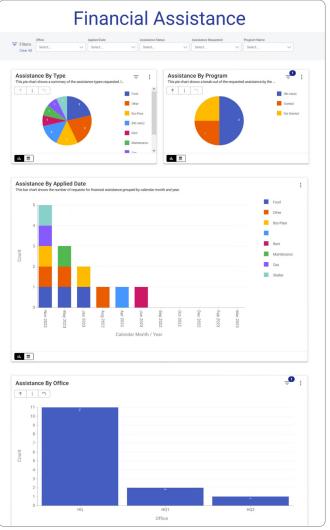

Veteran Claim Tilters Claim Type

IMPROVED DECISION MAKING AND COLLABORATION

Interactive Reporting allows you to extract key insights and surface critical data. The intuitive visualizations make it easy to share those insights with key stakeholders to enable collaboration and activities that improve your workplace. The optional ad hoc reporting capabilities enable even more flexibility.

The Interactive Reporting module allows Veterans' Benefits application users to see a complete picture of their work in order to make better decisions and better serve those who have served.
